# CLOUD STRATEGY AND DEPLOYMENT

- "cloud computing" permits companies to access or utilizes "software", "hardware", and many more services automatically while climbing "up or down" as required.

- "Cloud computing" includes appeared as a well-known technology according to its multiple benefits over non-cloud computing or solutions.

# RECOMMENDATIONS

The contrast of Cloud vs. non-cloud solutions for each aspect of the infrastructure was done .
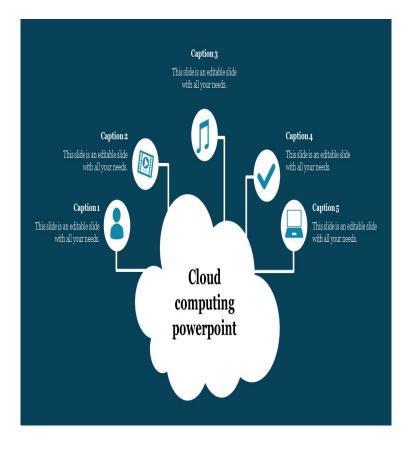

The recommendations were made according to SaaS.

CRM : Bigin Platform

Company Website:Azure

Email and communication: Google Workspace.

File storage and file sharing: Google drive or Microsoft one drive.

Service level and deployment type are appropriate for each aspect of their infrastructure .

# JUSTIFICATION

- Flexibility and Scalability

- Mobility

- Cost

- Reliability

# THANK YOU!
